

## **TURLEY FARMS – Installation of pumping chamber & mains along with multiple treatment plants, rural water supplies, plumbing & drainage work**

**PROJECT COMPLETION:** 2007 - 2010  
**PROJECT PERIOD:** On-going  
**COMPLETED ON TIME:** Yes, all projects completed on time.  
**TENDERED VALUE:** \$ 157,000.00  
**COMPLETED VALUE:** \$ 157,000.00  
**PROJECT MANAGER:** David Brunton  
**SITE SUPERVISORS:** David & Andrew Brunton

**BUDGET:** All projects completed to budget.  
**PERFORMANCE REPORT:** No  
**ACCIDENTS:** NIL  
**NONCONFORMANCE:** NIL

**PROJECT DESCRIPTION:** Install packed bed reactor treatment plant to service new office block and existing 7 bedroom dwelling. Installed a pumping chamber at office block and directionally drilled a pumping main under a river to the treatment system. Made connections into existing house drains. Installed several Oasis plants, rural water supplies and tanks, domestic drainage and plumbing to various Turley farms throughout the region.

We are South Canterbury agents for Oasis Clearwater Systems and have designed, installed and service over 400 domestic and commercial septic systems in the region over the past 20 years. These include pumping chambers, aerated treatment plants, packed bed reactor systems and anaerobic systems including the sewer membrane plant, reticulation and pumping chambers for Clandeboye Dairy Factory. We also have 5 vacuum trucks of differing sizes to aid in the installation & servicing of underground tanks. All installations are logged into and monitored on our GPS system.
